Senior Accounting Manager at Peakline Software | NetSuite | Month-end close

Denver, Colorado, United States · 500+ connections

About

I run accounting teams that close the books on time without burning out. Ten years in, from audit at a CPA firm to running the close at a growing SaaS company. I like systems that make the boring parts disappear: we moved from QuickBooks to NetSuite, and automated AP so nobody chases paper invoices any more. Open to accounting manager and assistant controller roles in Denver or remote.
